The History of the Peoples of the Eastern Desert

edited by

Hans Barnard
and
Kim Duistermaat

Monograph 73
Cotsen Institute of Archaeology
University of California, Los Angeles
THE COTSEN INSTITUTE OF ARCHAEOLOGY PRESS is the publishing unit of the Cotsen Institute of Archaeology at UCLA. The Cotsen Institute is a premier research organization dedicated to the creation, dissemination, and conservation of archaeological knowledge and heritage. It is home to both the Interdepartmental Archaeology Graduate Program and the UCLA/Getty Master’s Program in the Conservation of Archaeological and Ethnographic Materials. The Cotsen Institute provides a forum for innovative faculty research, graduate education, and public programs at UCLA in an effort to impact positively the academic, local and global communities. Established in 1973, the Cotsen Institute is at the forefront of archaeological research, education, conservation and publication and is an active contributor to interdisciplinary research at UCLA.

The Cotsen Institute Press specializes in producing high-quality academic volumes in several different series, including Monographs, World Heritage and Monuments, Cotsen Advanced Seminars, and Ideas, Debates and Perspectives. The Press is committed to making the fruits of archaeological research accessible to professionals, scholars, students, and the general public. We are able to do this through the generosity of Lloyd E. Cotsen, longtime Institute volunteer and benefactor, who has provided an endowment that allows us to subsidize our publishing program and produce superb volumes at an affordable price. Publishing in nine different series, our award-winning archaeological publications receive critical acclaim in both the academic and popular communities.

THE COTSEN INSTITUTE OF ARCHAEOLOGY AT UCLA

Charles Stanish, Director
Gregory Areshian, Assistant Director
Willeke Wendrich, Editorial Director
Julie Nemer, Publications Manager

EDITORIAL BOARD OF THE COTSEN INSTITUTE OF ARCHAEOLOGY

Willeke Wendrich  Area Editor for Egypt, North, and East Africa
Christopher Donnan  Area Editor for South and Central America
Jeanne E. Arnold   Area Editor for North America
Jeffrey P. Brantingham  Area Editor for the Paleolithic and Environmental Archaeology
Aaron Burke   Area Editor for Southwestern Asia
Lothar Von Falkenhausen  Area Editor for East and South Asia and Archaeological Theory
Sarah Morris   Area Editor for the Classical World
John Papadopoulos   Area Editor for the Mediterranean Region
Ex-Officio Members:  Charles Stanish, Gregory E. Areshian, and Julie Nemer
External Members:  Kusimba Chapurukha, Joyce Marcus, Colin Renfrew, and John Yellen

This book is set in 10.5-point Times New Roman, with titles in 28-point Mittelschrift.
Edited by Barbara Kohl

The image on the cover is showing a dromedary race between riders of the Beja Khatmuyah tribe as part of a religious festival (photograph by Lucy Skinner, Suakin Project, 2004). Such events are treasured celebrations of Bedouin life.

Word cloud created from Hans Barnard and Kim Duistermaat, *The History of the Peoples of the Eastern Desert*, by www.wordle.net written by Jonathan Feinberg (IBM Research). The cloud shows the 50 words that occur most often in the text giving greater prominence to words that appear more frequently.
Table of Contents

PART 1

1. Introduction to Part 1: From Adam to Alexander
   (500,000–2500 Years Ago) ................................................................. 2
   H. Barnard
   The Eastern Desert ................................................................. 4
   Outline of the Geology ......................................................... 6
   Early Human History .............................................................. 6
   The Eastern Desert in Pharaonic Times .................................. 14
   Some Editorial Remarks ....................................................... 20
   Everybody Needs an Editor ................................................ 21
   Less Is More ................................................................. 22
   Kill Your Darlings ............................................................ 22
   Acknowledgments ............................................................ 23

2. Contributions to the Prehistory of the Eastern Desert in Egypt ................. 24
   P.M. Vermeersch
   Lower and Middle Paleolithic Sites in the Eastern Desert .................. 26
   Sodmein Cave ................................................................. 28
   Wadi Bili .................................................................. 29
   Bili Cave Area ............................................................... 31
   The ‘Out of Africa’ Migration of Modern Humans ......................... 31
   The Upper Paleolithic ......................................................... 32
   The Late Paleolithic ........................................................... 32
   The Epipaleolithic ............................................................... 33
   The Neolithic and the Predynastic ........................................... 36
   El Gouna Shell Mound ......................................................... 37
   Steinplätze ................................................................ 39
   Rens Shelter ................................................................. 39
   Discussion ................................................................. 40

3. The Holocene Prehistory of the Nubian Eastern Desert ............................ 42
   M.C. Gatto
   Early Holocene Evidence ...................................................... 44
   Late Holocene Evidence ...................................................... 51
   Discussion ................................................................. 57
4. **The Journey to the Rock Art Gallery of Bir Nurayet (Sudan)**
   *K. Pluskota*
   
   5. **Boat Petroglyphs in Egypt’s Central Eastern Desert**
   *F. Lankester*
   - Geographical and Historical Context ................................................................. 67
   - Boat Petroglyphs: Typology .................................................................................. 69
   - Dating Boat Petroglyphs ....................................................................................... 70
   - Naqada I Boat Motifs. ......................................................................................... 71
   - Naqada II Boat Motifs ......................................................................................... 73
   - Naqada III Boat Motifs ....................................................................................... 73
   - Pharaonic and Later Boat Motifs. ........................................................................ 74
   - Overview of Sites with Boat Petroglyphs ............................................................. 75
   - ‘Arms Raised’ Figures ......................................................................................... 76
   - Discussion ............................................................................................................ 78

5. **Nomads at the Nile: Towards an Archaeology of Interaction**
   *C. Näser*
   - The Archaeological Record of the Pan-Graves ..................................................... 81
   - The Socio-Economic Constitution of the Pan-Grave People .................................. 84
   - A Case Study of Two Painted Skulls. ................................................................... 88
   - Discussion: Towards an Archaeology of Interaction. .......................................... 89

   *A.D. Espinel*
   - The God Min (Pan) .............................................................................................. 94
   - Falcon Gods in the Eastern Desert ...................................................................... 98
   - The Difficulties of Understanding Past Religious Beliefs ..................................... 102

8. **Sinai in Egyptian, Levantine and Hebrew (Biblical) Perspectives**
   *J.K. Hoffmeier*
   - Egyptian Terms for Sinai ................................................................................... 108
   - Hebrew Terms for Sinai ...................................................................................... 109
   - Early Human Presence in Sinai ........................................................................... 111
   - Egyptian Economic Interests ............................................................................ 111
   - The Desert People .............................................................................................. 112
   - Population Fluctuations in Sinai ........................................................................ 116
   - The Egyptian View of Sinai ............................................................................... 117
   - The Genesis Patriarchs in Sinai ......................................................................... 119
   - Forty Years in the Wilderness of Sinai ................................................................. 120
   - Mount Sinai ........................................................................................................ 122
   - Discussion ........................................................................................................... 124
Table of Contents

9. Vegetation and Management Regime Continuity in the Cultural Landscape of the Eastern Desert
   G.L. Andersen
   Long-Term Vegetation Change and Continuity........................................... 128
   Survival Strategies of Trees........................................................................ 132
   Traditional Management Strategies of Nomadic Pastoralists......................... 134
   The Effects of Discontinuity of Management............................................... 136
   Discussion and Conclusion........................................................................... 138

10. The Eastern Desert Tombs and Cultural Continuity
    K. Krzywinski
    The Eastern Desert and Its Peoples........................................................... 141
    The Ancient Sources on the Eastern Desert............................................... 142
    Ring Graves................................................................................................. 143
    Disk-Shaped Akerataheils........................................................................... 144
    Fishtail Akerataheils................................................................................... 146
    Muslim Graves.............................................................................................. 147
    Desert Grave Chronology............................................................................. 147
    Cultural Continuity in the Grave Monuments.............................................. 148
    Ring Graves and the Medjay Pan-Graves..................................................... 150
    Blemmyes and Disk-Shaped Akerataheils..................................................... 151
    Disk-Shaped Akerataheils, Blemmyes and Enigmatic Sites............................ 152
    Discussion.................................................................................................... 153
    A Note on Early Evidence for a Blemmy in the Eastern Desert...................... 155

11. The Desert Dwellers of Marmarica, Western Desert: Second Millennium BCE to First Millennium CE
    A.-K. Rieger, T. Vetter and H. Möller
    Egyptian Desert Environments................................................................. 157
    The Issue of the ‘Eastern Libyans’............................................................. 159
    The Natural Landscape................................................................................ 161
    Archaeological Sources on the Dwellers of Marmarica................................ 163
    The Cultural Landscape............................................................................... 164
    Ancient Water and Soil Management in Agricultural Areas and Settlements.... 165
    Temporary Settlements, Water Supply Points and Rangelands...................... 168
    Routes, Tracks, Alaam and Burials.............................................................. 170
    Drop-Sites and Northern Libyan Desert Ware............................................. 172
    Comparison Between Research in the Western and the Eastern Deserts......... 172
PART 2

12. Introduction to Part 2: The Last 2500 Years

H. Barnard
The Desert Today ......................................................... 181
Beja Clans and Tribes ................................................. 182

13. The Eastern Desert during the Ptolemaic Period:
An Emerging Picture ..................................................... 190

J. Gates-Foster
The Ptolemaic Eastern Desert: Precedents, Sources and Evidence ............................................. 191
The Third Century BCE .................................................. 196
The Second and First Centuries BCE ......................... 199
The Probable Role of Nomadic Groups in the Ptolemaic Eastern Desert ........................ 201

14. Nabataeans in the Eastern Desert during the Roman Period .................................................. 204

R.Z. Mohamed
Nabataean Maritime Routes on the Red Sea ................................................. 206
Nabataeans in Egypt ...................................................... 208
Nabataean Inscriptions from the Late Ptolemaic Period ................................................. 209
Nabataean Inscriptions from the Roman Period ................................................. 209
Wadi Hammamat (Between Qift and Quseir) ................................................. 211
Discussion ................................................................. 212

15. Roman Gold Mining in the Eastern Desert:
The Mining Settlement in Wadi Bakariya ................................................. 214

B.J.M. Tratsaert
The Prospecting and Exploration Phases ................................................. 217
The Development Phase .................................................. 217
The Exploitation Phase .................................................. 221
Discussion ................................................................. 224

16. A Blemmy by Any Other Name...: A Study in Greek Ethnography ................................................. 226

R.H. Pierce
Ethnicity in the Eastern Desert ............................................. 228
The Megabaroi ............................................................. 228
The Trog(loid)etes .......................................................... 228
The Blemmyes .............................................................. 231

17. Blemmyes, Noubades and the Eastern Desert in Late Antiquity:
Reassessing the Written Sources ................................................. 238

J.H.F. Dijkstra
Previous Scholarship on the Society of Late Antique Lower Nubia ............................................. 240
The Problem of the Historical Sources of the 4th Century CE ............................................. 241
The Society of Northern Lower Nubia in the 5th Century CE ............................................. 243
