

TABLE OF CONTENTS

CHAPTER ONE

J.W. Eerkens and H. Barnard

Introduction

	<i>1</i>
Growth of Residue Studies	1
Scope of the Current Volume	5
References	7

CHAPTER TWO

R.K. Lusteck and R.G. Thompson

***Residues of Maize in North American Pottery:
What Phytoliths can add to the Story of Maize***

	<i>8</i>
Materials and Methods	9
Results	12
Conclusions	15
References	16

CHAPTER THREE

M. Lombard and L. Wadley

***Micro-Residues on Stone Tools:
The Bigger Picture from a South African Middle Stone Age Perspective***

	<i>18</i>
How Blind Tests improved our Method	19
Zooming Out	21
Conclusion	22
References	23
Caption to the Color Plate	28

CHAPTER FOUR

N.I. Shishlina, A.V. Borisov, A.A. Bobrov and M.M. Pakhomov

***Methods of Interpreting Bronze Age Vessel Residues:
Discussion, Correlation and the Verification of Data***

	<i>29</i>
Cultural Context	29
Methodology	30
Determination of Phosphate Residues	31
Archaeobotanical Analyses	32
Results	36
Interpretation of the Results	36
Discussion and Recommendations	38
Conclusion	39
References	41

CHAPTER FIVE

H. Barnard, A.N. Dooley and K.F. Faulk

An Introduction to Archaeological Lipid Analysis by GC/MS

	<i>42</i>
Lipids and Fatty Acids	42
Extraction of an Archaeological Sample	46
Additional Treatment of the Sample	47
Gas Chromatography (GC)	48
Mass Spectrometry (MS)	50
Interpretation of GC/MS-results	56
Glossary	57
References	59

CHAPTER SIX

M. Regert

***Elucidating Pottery Function using a Multi-step Analytical Methodology combining
Infrared Spectroscopy, Chromatographic Procedures and Mass Spectrometry***

	<i>61</i>
Organic Remains and Pottery Production	62
Organic Remains and Pottery Function	63
Organic Remains and Pottery Repair	63
Analytical Strategy	63

	Interpreting Analytical Data	66
	Description of the Samples	68
	Pottery with Tars or Resins	71
	Conclusion	72
	References	73
CHAPTER SEVEN		
M.E. Malainey		
	<i>Fatty Acid Analysis of Archaeological Residues: Procedures and Possibilities</i>	77
	Previous Research	77
	Development of the Identification Criteria	78
	Testing the Validity of Identification Criteria	81
	Experimental Procedures	81
	Oven Storage of Cooking Residues	82
	Soil Storage of Cooking Residues	84
	Sample Selection and Handling Guidelines	86
	Conclusion	88
	References	88
CHAPTER EIGHT		
J.W. Eerkens		
	<i>Organic Residue Analysis and the Decomposition of Fatty Acids in Ancient Potsherds</i>	90
	Organic Residue Analysis	90
	Decomposition: Food Sciences Perspective	91
	Decomposition: Archaeological Perspective	92
	Dealing with Decomposition	92
	Fatty Acid Ratios	93
	Conclusions	94
	References	96
CHAPTER NINE		
T.F.M. Oudemans and J.J. Boon		
	<i>A Comparative Study of Extractable Lipids in the Sherds and Surface Residual Crusts of Ceramic Vessels from Neolithic and Roman Iron Age Settlements in the Netherlands</i>	99
	Introduction: Lipid Analysis in Ceramic Studies	99
	Introduction: Types of Residues	99
	Introduction: Aims	100
	Experimental: Sample Material and Treatment	100
	Experimental: Instrumentation	101
	Experimental: Quantification	102
	Results: CHN Analysis	104
	Results: Qualitative Lipid Analysis	104
	Results: Quantitative Lipid Analysis	105
	Discussion: Lipid Quantification	108
	Discussion: Chemotaxonomic Markers	108
	Discussion: Lipid Preservation and Degradation	110
	Discussion: Possible Origin of Lipids	111
	Discussion: Lipids from Surface Residues	111
	Discussion: Lipids Absorbed in Ceramics	112
	Discussion: Chars from Other Sites	112
	Discussion: Sampling Issues	112
	Conclusions	113
	References	121
CHAPTER TEN		
J. Cassidy		
	<i>Patterns of Subsistence Change During the Final Neolithic in the Primorye Region of the Russian Far East as Revealed by Fatty Acid Residue Analysis</i>	125
	The Bronze Age in the Primorye Region	126
	Zera Lake	127
	Macrobotanical Analysis	129
	Fatty Acid Ceramic Residue Analysis	131

Table of Contents

	Conclusions	134
	References	135
CHAPTER ELEVEN		
H.A. Hoekman-Sites		
<i>Using Residue Analysis to Confirm Trade Connections at Pella, Jordan</i>		138
	Trade at Pella	138
	Theory behind Derivatization	140
	Sample Selection and Preparation	141
	Procedures and Criteria	142
	IR and GC/MS Results	142
	Interpretation of the Results	143
	Specific Plant Identification	144
	Conclusion	146
	References	146
CHAPTER TWELVE		
E.A. Reber		
<i>The Well-Tempered Pottery Analysis: Residue and Typological Analysis of Potsherds from the Lower Mississippi Valley</i>		148
	Archaeological Background	148
	Description of the Sites	149
	Methods	151
	Results	152
	Discussion	156
	Conclusions	158
	References	158
CHAPTER THIRTEEN		
C. Solazzo and D. Erhardt		
<i>Analysis of Lipid Residues in Archaeological Artifacts: Marine Mammal Oil and Cooking Practices in the Arctic</i>		161
	Cooking Practices in the Arctic Coastal Areas	161
	The Artifacts	163
	Archaeological Samples	163
	Modern Specimens	165
	Analytical Methods	167
	Fatty Acid Profiles in Modern Specimens	167
	HTGC Results of the Archaeological Samples	170
	GC/MS Results of the Archaeological Samples	170
	The Samples from Miyowagh	171
	Artifacts from Alaska and Labrador	173
	Discussion	177
	References	177
CHAPTER FOURTEEN		
S.M. Rafferty		
<i>The Archaeology of Alkaloids</i>		179
	Examples of Alkaloid Archaeology	180
	Discussion	185
	References	186
CHAPTER FIFTEEN		
D.E. Beehr and S.H. Ambrose		
<i>Reconstructing Mississippian Diet in the American Bottom with Stable Isotope Ratios of Pot Sherd Residues</i>		189
	Cahokia and its Neighbors	190
	Diet Reconstruction	192
	The Archaeological Sites	192
	Methods and Results on Untreated Samples	193
	Methods and Results on Treated Samples	195
	Discussion and Conclusions	196
	References	197

CHAPTER SIXTEEN**H. Barnard, S.H. Ambrose, D.E. Beehr, M.D. Forster, R.E. Lanehart,
M.E. Malainey, R.E. Parr, M. Rider, C. Solazzo and R.M. Yohe II**

<i>Results of Seven Methods for Organic Residue Analysis Applied to One Vessel with the Residue of a Known Foodstuff</i>	200
Birth of the 'Round Robin'	200
Camels and Camel Milk	203
The Analysis of Camel Milk Residues	204
Results of the 'Round Robin': Stable Isotopes	205
Results of the 'Round Robin': Proteins	207
Results of the 'Round Robin': Lipids	208
Discussion	211
References	213

CHAPTER SEVENTEEN**H. Barnard, L. Shoemaker, M. Rider, O.E. Craig, R.E. Parr, M.Q. Sutton
and R.M. Yohe II**

<i>Introduction to the Analysis of Protein Residues in Archaeological Ceramics</i>	216
The Preservation of Proteins	216
Proteins as Archaeological Biomarkers	217
Extraction of Archaeological Proteins	218
Immunological Detection	218
Gel Separation and Proteomics	220
First Case Study: Cannibalism at Cowboy Wash	222
Second Case Study: Proteins on Stone Tools	223
Third Case Study: The Origins of Dairying	224
Fourth Case Study: Proteins in Paint Media	224
Fifth Case Study: the Round Robin	225
Discussion	227
References	228

APPENDIX I: COMMON ISOTOPES OF 99 ELEMENTS**232****APPENDIX II: A SHORT OVERVIEW OF PROTEIN BIOCHEMISTRY****236**

Transcription	238
Translation	240
Post-translational Modifications	240
Mutations	242
Antibodies	243
Chirality	244
Denaturation, Decomposition and Diagenesis	245
Collisionally Induced Dissociation	247
Glossary	248
References	252

LIST OF FIGURES AND TABLES**253****THE AUTHORS****261****INDEX****263**

INDEX

α -carbon...42
 $\delta^{13}\text{C}$...205-207, 212
 $\delta^{15}\text{N}$...192, 205-207, 212
 $\Delta\text{P}_2\text{O}_5$...37-39
 ω -3 fatty acid...44, 92
 ω -carbon...42, 44

--- 1/10 ---

2-DE...220, 221
 ^{12}C ...44, 53, 55, 192, 204
 ^{13}C ...12, 13, 44, 53, 190, 192-196, 204, 207
 $^{13}\text{C}/^{12}\text{C}$ ratio...12, 13, 190, 192, 204
 ^{14}C ...44

--- A ---

abietic acid...71
aboriginal...182, 186, 223
acetanilide...101
acetolysis...32
acetonitrile...49, 208, 221, 226, 248
ACN...208
acorn...150, 128, 130, 223
acrylamide...49, 219
active hydrogen...47
acyl...103-105, 107-109, 111, 113, 115, 117, 119, 171
acylglycerols...102, 210
Addis...149
Adena Culture...183
adenine...238, 239
adhesive...1, 20-22, 61-63, 66, 68, 71-73
adipocere...109
Adlavik Harbour...165, 166, 173
agarose gel...207, 219
Agave perryi...81
age...20, 29, 36, 40, 45, 93, 100, 161, 190
agitation...218
agricultural activities...128
alanine...245
Alaska...161-166, 173, 176, 177
alcohol...9, 10, 64, 102, 140, 141, 153
Aleutian Islands...161, 163, 166, 172, 173
Algonquian...185
alkaloid...42, 56, 179, 180, 182-186, 212
Altmann...238
Amadori rearrangement...217, 245, 246
amaranth...149, 208, 243
AMDIS...132
American Bottom...2, 189-192, 194, 196, 197
amino acid...90, 96, 110, 204, 216, 217, 221, 222, 225, 227, 236-247
aminolysis...245
ammonia...207, 218, 245
ammonium hydroxide...47, 207, 208, 218, 219
AMS...8, 10, 12, 13, 15, 189

amyotrophic lateral sclerosis...242
amyrin...69
anabasine...184
anaerobe...217
anaerobic...62, 109, 177, 217
animal food...38, 88, 192
animal protein...191, 192, 208
aniseed...39, 138, 145, 146
anode...208, 219
anthropogenic transformation...61, 66, 71, 73
anthropological archaeology...125
antibody...49, 205, 208, 217-220, 222-225, 227, 228, 243, 244
antibody-antibodies...218-220
anticodon...239
antigen...49, 205, 208, 218-220, 222-224, 227, 243, 244
Antilocapra americana...223
antiserum...205, 208
anvilstones...128, 135
apatite...191
APCI...51, 52
archaeobotanical...12, 30, 71, 88, 149, 150, 155, 157, 158, 179, 183
Arctic...161, 163, 165
Argentina...16
arginine...220, 227, 241, 247
aromatic...91
array detector...52
Artemisia lerchiana...36, 38
Asia...2, 138, 203
asparagine...241, 245
Astbury...238
atmospheric pressure...51, 52
Atropa belladonna...185
atropine...182, 185
average mass...53, 237, 240-242
Avery...238
Aztec...182

--- B ---

backed tool...20, 21
bacteria...45, 90, 91
Baga-Burul...30, 31, 34-38
Balmoral phase...150
Banisteriopsis caapi...185
bark...19, 28, 62-64, 68, 71-73, 146, 155, 181
barley...31, 33, 39, 125, 129, 130, 201
base peak...54
Bayou des Familles...149, 151, 155, 157
